Aim Cfg Cs 100 Hsl Free

As we have already said, the best way to study the models of the AIM family of weapons is by simulating them in Counter-Strike 1.6. Here, I will make my own simulations with the aim of calculating some statistical information about them in order to verify if the model is reasonable, and see what kind of damage it can achieve. The goal of this project was to give the community a tool to replicate the damage of a few proposed weapon setups. I created two files, one named AimCfgCs100Hsl.cfg which is the config for the weapon and the other named AimCfgCs100Hsl.cfg.mum which is the configuration for the aim kit. This is the first part which includes the Aim Setup and the Aim Kits. Next I'll give a brief description for each of the files..
