Personally, I use Elements 11 for all my graphic design and illustration work and Elements 2018 for my photography work. This article will guide you through everything you need to know about Elements and how to use it. Unfortunately, Adobe has announced that Elements 2018 will reach end of life at the end of January 2020. If you are currently using Adobe Elements, you are encouraged to upgrade to the current version of Photoshop (Photoshop CC 2019). Photoshop CC 2019 offers a variety of powerful features for different kinds of image editing. Adobe Photoshop Elements – Price and Upgrades There are three main versions of Photoshop. There are Adobe Photoshop Elements, Adobe Photoshop, and Adobe Photoshop Pro. Adobe Photoshop Elements – Free Adobe Photoshop Elements Photoshop Elements is free. It supports 16 colors, 300 dpi and 25 resolution. As you can see in the image below, it is much simpler and faster to use than professional tools. Adobe Photoshop Elements – Upgrades To upgrade to the next version of Adobe Photoshop, you need to pay for a license. However, if you have a license, you can upgrade to a new version of Photoshop Elements. To get a license, you can buy Photoshop Elements through the Apple App store. It is the easiest and recommended way to upgrade. To upgrade, you just need to download the app and install it. You will receive an email with the license key. If the email address is not associated with a Google account, you may need to create a new account. If you have a previous version of Photoshop that you want to upgrade, you can buy the upgrade and download it. However, as it will be downloaded from the internet, it will most likely cost you money to download. To avoid this, you can wait for Apple to send out a new version of Photoshop, instead of downloading it. To download the version of Photoshop you need to upgrade to, click on the “Help” button at the top right of your Mac or iOS device and follow the instructions. You can also get a license to upgrade to the latest version of Photoshop on your own. You will get a license within minutes, because they will send you a license key from the Apple Apps store. GitHub Open Sources the Chromecast: "We know there is a market for this" - davemead ===== joebo > GitHub will be providing the physical servers and full-blown Google > infrastructure in case you want to host your own Chromecast. "Hosting it is > recommended if you want to do so at scale." Hmm... something to keep in mind if there's a lot of interest in a project. ---- quadrangle That's the approach that Reddit does with their own hosting. They provide the physical servers and own infrastructure, and you put your content into that infrastructure, but you still keep the source on GitHub to encourage contributions. The content you put in Reddit's infrastructure is also minimally seen by outsiders so people don't get any questionable reputation over there. ----- joshmlewis I'm disappointed there was no mention of the actual hardware itself. ---- NegativeK I'm wondering the same thing. I'd guess they know enough about the circuit details for the Chromecast to describe it accurately, but I would love to know more about what's going on in the silicon. ----- phmagic I think if you look at a phone/tablet/desktop client, you'll see the development of that UI and how developers like working will be applicable across a wide variety of devices. ---- JDiculous Agreed, most apps are cross platform nowadays, even mobile games are seeing strong cross platform play. Cortisol and testosterone in female humans during the follicular and luteal phases of the menstrual cycle. In order to examine the effects of changes in gonadal function on free cortisol and free testosterone, 23 women, aged 16 to 24, were studied during a menstrual cycle. Blood samples were obtained on two consecutive days from each subject, from days 1 through 8 and from days 14 through 19 of the menstrual cycle. Plasma free cortisol concentrations were elevated, with maxima occurring on days 7 through 14. Although there were no significant correlations between cortisol and luteinizing hormone or estradiol, there was a highly significant correlation ($r = 0.75$, P less than 0.0005) between
