AnyDVD HD v6.8.1.0 Final + NovaKiller v1.8 + AnyTrial v0.2 + Patch [Original] is tested by thousands of real users every day. AnyDVD HD v6.8.1.0 Final + NovaKiller v1.8 + AnyTrial v0.2 HD DownloadQ: Is there a fast, non-graph database out there? I'm wanting a non-graph database. I'm looking for something that has greater performance, is lightweight, and doesn't store too many instances of each column. SQL is out. I'm looking for something that I can browse as "tables" like a spreadsheet does. A: You have two ways. Use file system and use Text Search. File system is slow, but light weight. Use memory mapped file, that is use.net MemoryMappedFile class. Memory mapped file is faster than file system. There are following solutions for you to find good class library for File System Using Jagged arrays. Using.net MemoryMappedFile class For MemoryMappedFile class and MemoryMappedViewAccessor have lots of examples. See this link. MemoryMappedFile A: A couple of years ago (2010), I moved from SQLite, to a non-SQL solution (Redis), mainly because it was quicker. Now it's not quite as fast, but I still like it. I'm not very good at explaining how I use it, and I only have a thin understanding of how it works. It's definitely more lightweight. A: Simply Apache's HBase could fit what you want. Its main characteristics: Write/Read performance is good. Advanced queries are supported, but you can write your own. Q: Can I open the Bag of Holding with only a single wand? Can I open the Bag of Holding, if I use only one wand, i.e. if I've just used it to cast the spell, and I don't have a second to use it on it? A: In theory, yes. Except for the general rule of thumb that multiple wands spell activation provokes melee attacks, it is not restricted to using
