Mobile App A mobile app is a program which can be run on mobile devices, such as phones and tablets. Mobile apps are typically light-weight programs, for example, games. Web App Web app refers to web pages that look and behave like desktop applications but instead run in a web browser. Web apps are usually made up of server-side code that is interpreted and displayed in a browser, rather than through the browser's own interpretive engine. Web apps can use a local server, a web server, a CDN, or a combination. Map An interactive, two- or three-dimensional map that shows geographical features, including coastlines, rivers, lakes, and mountains. The most common use of a map is to show where various places, routes, and transportation hubs are located, but it can also be used to show relationships between places in an organization, such as offices, departments, or geographical locations. Map Editor A map editor is a software application designed to create, edit, manage, and display maps. Users may add or modify map features such as roads, buildings, and points of interest using the map editor. Search Index An index of all features that are displayed on a map, such as street names or points of interest. Indexes can be hierarchical or non-hierarchical, allowing users to search by name or by location. For example, an index of every city in the United States would be a non-hierarchical index. A hierarchical index would allow the user to search by location of a city. For example, a user could look up cities with zip codes from the northeast. State Department Store A state department store (or retail department store) is a type of department store, a type of retail store which focuses on high-volume sales, typically of books, clothing, food, toys, and seasonal items. The term is also applied to specific stores in specific countries, such as a California state department store. Topological map A topological map is a representation of a map in which the map has a flat grid-like structure in which each area of the map is assigned a unique number. For example, the city of New York can be represented as a grid, with each numbered square representing a specific area. Topological maps can be used to display land-use data on a map. Web store

What's New in the AutoCAD?

Guides: Add, enhance, and share comprehensive vector guides to your drawings. Master Vector Content: Reuse and extend Vector Objects. Master and manipulate Vector Objects in new ways. Easily add items to drawings, such as: Text, Annotations, Shapes, Symbols, Dimension Markers, Footprints, 3D Faces, Axes, and more. Create new objects and duplicate existing ones for direct incorporation into your drawings. (video: 1:12 min.) Achieve architectural design excellence with the ability to rapidly import shapes into CAD from a variety of sources, including from CAD: IFC, EBOM, BIM 360, AutoCAD Design. Improve your workflow with a new, powerful and customizable built-in blueprinting engine that incorporates changes from your design review sheets. How about a new way to import and share your Feedback on drawings with the new Feedback on drawings (FoD) option? Add Shapes to your drawings with Precision: An easy way to reproduce the most detailed models possible, whether you're using Revit, ArchiCAD, CAF Builder, Master of Architecture, or using a file-based model. (video: 1:03 min.) Symbols: Create accurate, dimensioned symbols for all types of applications, including schedules, schedules and more. 3D Objects: Easily import and edit CAD models. Add your own 3D objects. Dimensioning: Add, view, and edit your drawings' dimensioning quickly and easily. (video: 1:02 min.) Modern User Interface: Get on with the job, in a high-performance, modern UI that's consistent across your applications. Smart Scaling: Make sure that your drawings and your canvas are perfectly aligned every time you open your drawing. New styles: New toolbars, palettes, menus, and more for a comprehensive set of new tools and features. CAD Tips: Learn new AutoCAD tips and techniques that can save you time and improve your productivity. How to speed up your CAD work with a few simple steps: Measure twice, cut once. Easily reuse common shapes and create custom geometry. Use the new Material Select dialog box to easily choose a material and apply it to your geometry.
