Dejavu for Mac is a great PhotoCollage program. In addition to the popular PhotoCollage feature, it offers a diverse selection of new tools and effects. It's easy to use, as you can either start with one of the built-in collages or import your own pictures. Create stunning collages on the fly Dejavu has been designed for people with more than just one camera and one or two computers. You can upload images to your account via the website and you can also transfer them via USB, FireWire or network. When you import a new image, you can choose one of five background patterns or create your own pattern. You can crop, resize, flip or rotate images and then save them to a new collage. You can add effects like vibrance, blur, saturation, vignette, color, sepia tone and more. You can change the type and order of the objects and decide if you want to view them all at once or individually. What's more, you can blur the edges of the objects you select and adjust the duration and fade in/out animation. If you want to add a slight 3D effect, you can do that with the new 3D option. Lastly, the last scene you saved can be turned into a slideshow or made into a movie. DeskScapes is a program that enables you to customize your desktop wallpaper, thanks to some attractive backgrounds and image effects. Neatly customize your workspace The user interface is quite appealing and easy to navigate through. A welcome screen informs you that there are some panels in the bottom that you can access, in order to personalize backgrounds. You can simply select and use a wallpaper, which can be either an image, a video, hybrid, or dynamic. You can also filter backgrounds according to their rating, apply a random background, or recolor your existing wallpaper (select the part of the wallpaper you want to recolor, pick the color to apply, and adjust color saturation). Configure animations, colors, and effects Furthermore, you can change settings for each type of wallpaper. For instance, you can set the number of shapes you want to have displayed at once, the speed of an animation, or you can create slideshow images or hide particular objects in a picture. In order to further customize your wallpaper, you can add image effects - Alien World, Black and White, blue channel only, blue sky filter, burn effect, canvas texture, desaturate, grayscale, sepia, mirror or snow. Additionally, you can search for a particular background, download and install more backgrounds, adjust quality settings, enable support for additional graphics cards, correct aspect ratio on secondary monitors, set desktop icon transparency, and more. To end with Objects take a few seconds to load after you click them, and the program froze once during our tests (after applying a background). Otherwise, DeskScapes uses a moderate amount of system resources and certainly brings a unique feel to any desktop. AVG!
