Q: Get a list of words appearing in three different documents I have a list of words stored in a text file, they are all split by a space. How can I create a java program that is able to get a list of the words that appear in 3 of the files in the directory? File directory = new File("C:\\Users\\test\\Desktop\\texts\_dir"); File[] files = directory.listFiles(); ArrayList list = new ArrayList(); //This loop is to get a count of files in directory for (File file : files){ if (file.isFile() && file.getName().toLowerCase().endsWith("txt")) { list.add(file.getName().toLowerCase()); } } //This loop is to create an array of words, from each file in directory for (String file : list){ try {
