Hi, I bought the game today and I downloaded it but I can't find the cd key to play multiplayer. Where to find CD-KEY? and asks me to "install the game", but when I click "install the game" the game does not start. What should I do? Answer: This is not a problem. But the problem is that the game won't start. 1. Go to Program Files\\Gameloft\\Gameloft Web\\Gameloft Games\\Race Driver: GRID\\ 2. You can install the game to "Program Files\\Gameloft\\Gameloft Web\\Gameloft Games\\Race Driver: GRID\\" folder. 3. In this place, find the "game" file, this is the one you need to start the game. 4. Click on it once.
