Kolor Neutralhazer is a Photoshop plugin which allows you to remove the atmospheric phenomenon of haze in your photos and panoramas. Each pixel is able to be adjusted independently, colors can be blurred and they can be masked on an image. Kolor Neutralhazer is easy to use: Select your favorite setting according to your needs - From i) natural - ii) dark - iii) fast to iv) full. A keyboard shortcut allows you to repeat actions. The setting button allows you to quickly switch between different adjustment types. The response rate is in real time. Use Kolor Neutralhazer allows you to hide the borders of the image. By using Kolor Neutralhazer you can to apply different mask options to the image. Kolor Neutralhazer Activation Key: License Key: Useful Alternative Photoshop Remover Haze by Kartra Photoshop Haze by Pixel Emperor Please share the plugin, even you need it. Good fast update. the only thing is that I want it to be more flexible. I'd like to be able to easily edit the settings for the transition damping. Such as be able to add smooth mode, and have it act more like a traditional Gaussian blur and not just white noise after you apply the blur. It does what I want but I prefer a more advanced graphic user experience to help

**What's New in the Kolor Neutralhazer?**

- with Kolor Neutralhazer you can easily remove haze in photos and panoramas - you can control the transition between the foreground and the background and the influence of the haze - an adjustable mask is always visible - can be activated in the EXIF standard for photos and panoramas - with the Kolor Custom Adapter (KCA) it is also possible to identify the depth of the pixels - works also with RAW files Advantages of Kolor Neutralhazer: - The conversion of RAW files can be performed with Kolor just with a click - a neutral color is calculated from the alpha of each pixel - the program generates a new alpha channel for the photo - Kolor Neutralhazer is not limited to photographic images - supports a variety of RAW image formats (PPF, TIFF, RAF, CR2, NEF, X3F, VTF) - supports various versions of Photoshop - works also with RAW files Warning: This is freeware but it includes a trial period. After the evaluation has finished, Kolor Neutralhazer can not be uninstalled.
