- The migrated passwords are saved in the same file as before. - The converted files will be saved in the Password Picker Converter's folder. - Application automatically looks for a converted.ppf file in the Password Picker Converter's folder to restore the saved passwords. Fixed a problem with the encoded password. Now the password is replaced with '*' to prevent strange characters. The original password still works. Thanks! Version 1.5 Version 1.3 Version 1.2 Version 1.1 Version 1.0 User Guide (English) Examples (English) Developers Guide (English) Important: It is recommended to use the latest version of Password Picker. The original password still works. (compatibility with previous versions of Password Picker 0.3.1) Compatibility with the previous versions of Password Picker The Password Picker Converter application works with all versions of Password Picker 0.3.1. Some versions of the Password Picker Converter have the same name as the original application. Password Picker Converter - Version 1.0 Password Picker Converter - Version 0.4.3 You are welcome to file bugs or requests. A: I have long ago lost the password hashes I generated and so I now have no interest in keeping a copy of the hashes in a password database. I should have done this ages ago but I couldn't find a compelling reason to move to OpenSSL from Bcrypt. Instead I settled for Bcrypt with no salt for all my scripts. However my Bcrypt password has not been compromised as my public key (used to protect it) is kept secret.
