Tip The easiest way to make an image lighter or darker is to use the Levels tool. If you want to adjust the brightness of the whole image at once, try the Curves tool. *
Layers*. This tool allows you to organize individual elements in a composite image. Each layer is a separate image that you can use to create a whole new image—or you can use it to place some of the parts of one image over another.

What's New in the?

Clone Stamp features include: 1. Load an image into Photoshop 2. Select the area that

needs to be repaired. 3. Click on the “Clone Stamp” button to start cloning the area 4. Click on the “Paste Special” icon to paste the image. 5. Select one of the following options: a. The content of the source image is used to paste the new area. b. The selection is cleared. Bleaching is the term used to describe one of the Photoshop tricks that simulates snow effect. There is no easy way to bleaching an image, but here are some useful tips that may help. 2. How to apply snow effect: a. Create a new document and set the white point to 487,0 b. Open a picture c. Choose the brush tool d. Now, apply the pigments to the image 2. How to use: a. The faster you paint, the more snow you will see. b. Be sure that you

are not going over the same area twice so you do not end up with a white rectangle. c. If you see it already, use the bleaching tool to remove what you painted. Rainstick is a type of rain effect in Photoshop that you can achieve easily and quickly. Most of the time you will find photos on the web with some virtual rain and a sky that looks a little like clouds. In Photoshop, it is not so hard to make raindrops, but to add a lightning effect can be quite hard. But once again, it is possible if you know the trick. Below are the steps on how to make a rainstick effect in Photoshop: 1. Open the new document 2. First, select the Paint Bucket tool 3. Set the foreground color to the dark color that you want 4. Use the brush tool, fill the bucket

with the color you just choose 5. Invert the selection (control + i) 6. Erase the selection (control + e) 7. Delete the selection (control + k) 8. Use the Liquify tool to make some shapes on the images 9. Use the Gradient tool (g) to get color gradient 10. Use the Dodge tool (a) 11. Use the Burn tool (b)

Selecting a background image for your website or web page can be tricky, especially if you
