## SCCM Client Actions Tool With Serial Key [Latest 2022]

This is the official home of SCCM Client Actions Tool Activation Code Description: SCCM Client Actions Tool Description is a lightweight utility whose purpose is to help IT professionals carry out administrative tasks on System Center Configuration Manager 2007 clients. The tool offers support for remote actions on one or multiple computers, and can be deployed on Windows XP, Vista, and 7. Portable running mode The utility is portable so it can be stored on USB flash drives or other devices so you can have it with you all the time. Gaining access to its features requires only opening the executable file because there's no installation setup included in the process. User interface The GUI looks straightforward and well organized. You can build up a list with computers and set up the actions that are triggered on the target computer remotely. Importing computer list SCCM Client Actions Tool gives you the possibility to load the list with computers from a file (XLS, XLSX, CSV, TXT), import data from SCCM collection, or manually enter the information in the text area. Supported remote actions The application offers support for a wide range of remote actions and it organizes them with the aid of five categories, namely Client schedule, Client agent, Client health, Advertisement, and Other actions. You are offered the freedom to set up common SCCM client schedule options, manipulate SCCM client agent (e.g. install/uninstall agent, change GUID, assign site code, change cache size), run health checks with or without fixes, copy a file to a remote PC, Wake-on-LAN, query for different values from remote computers, switch between integrated authentication and alternate credentials, and automatically install SCCM client during health check in case the version is too old or agent does not work. An overall efficient tool All things considered, SCCM Client Actions Tool offers support for an impressive number of remote actions that you can activate on target computers. Unfortunately, the application does not receive updates and improvements any longer because the project is discontinued. It has a new successor, SCCM Client Actions Tool PowerShell Edition (so-called PoshCAT). Server-specific products and packages This category contains various add-ons for specific server platforms. The aim of these additions is to enhance functionality of such applications, fill the gap of missing functionalities, add new features, or just provide alternative solutions. They are listed by the server operating system/platform they support, so there
