
Copilot Live Europe Cracked Apk 5 [BETTER]

December 19, 2014 - This feature-packed and intuitive app provides navigation comparable to mid to high end offline satellite navigation at a fraction of the price. Unlike most car navigators, this program contains much more information about the route than a simple direction of travel. The app also offers information on public transport traffic and nearby places to park and view. In addition, it contains information about traffic (including roadworks), weather and more. I can't find it in the app store. I tried installing it from the Play Store, Google Play, and other search services.
