present invention relates to methods and apparatus for controlling  
power distribution in a power grid. Power distribution networks  
for delivering power for consumption generally include a plurality

---

of power generation stations and a plurality of power consumption stations. The power consumption stations consume power generated by the power generation stations. A common method of controlling the power distribution networks is the use of a centralized energy management system. The centralized energy management system receives a plurality of power measurements and control signals from a plurality of 570a42141b
