In order to plan the development of the aerodrome, the area to be allocated to the aerodrome should be determined. The area is defined by its contours. The contour of the aerodrome is divided into the runway area, the aprons and the holding bay area. Field of the Invention This invention relates to a power supply circuit capable of generating a power supply voltage in accordance with a duty ratio of a PWM (pulse width modulation) signal. 2. Background Art There is a power supply circuit for producing, for example, a power supply voltage of 5 V and a power supply voltage 3e33713323
