Edimax PowerLine Utility

Windows Vista compatible software designed to ease out of the box the configuration of serial modem and ISDN Gateway devices and enables users to manage their network devices by using a plug and play device from the same gateway. KEYMACRO supports virtual serial connection over powerline. KEYMACRO includes modem drivers and applications such as DHCP client, DNS resolver, UPnP clients and UPnP server and also PPPoE/PPPoA client and server. KEYMACRO allows users to easily access to services on the internet or to manage their network devices by using a single gateway device. KEYMACRO is developed with the purpose

of offering a solution for users who are not familiar with Windows 7/8 network troubleshooting and management. KEYMACRO is developed based on Microsoft OSI-OSPF IPv4/IPv6 stack on Linux kernel. KEYMACRO runs on: Windows Vista/7/8, Linux. KeyMACRO is designed to be installed on Gateway and physical device as well as on Virtual device. KEYMACRO supports graphic console and CLI.
