When you open the drawing, the layers are arranged as appropriate for that type of document (CAD or technical drawings, structural, installation drawings, plans, etc.). User Interface The user interface uses the standard main screen, the "sketchbook," and the toolbars and drop-down menus. The main screen is divided into three sections: the drawing area, the configuration area and the status bar. The drawing area is a view of the active drawing area at a given time. The objects are drawn to scale, and the background color is shown (use the "Show Shaded Regions" button on the status bar). This view can be scaled (which increases the number of objects on screen), or the window can be zoomed in and out, to view the entire drawing or a smaller area. A zoomed-in view of the drawing area is called an annotation area. The cursor for drawing and annotation can be shown and hidden by pressing the M key. The configuration area is a set of control panels at the top of the main screen that can be shown and hidden by clicking on the small circle at the top left of the screen. This allows the user to access most functions of the program in one central location. There is a status bar at the bottom of the screen, and the drawing area is located in the middle. The icons on the status bar indicate how the drawings are currently selected (single object, group, selection, layer) and the type of tool used (drag, tool, view). There are toolbars at the top and bottom of the screen that contain the frequently used commands. To the right of the status bar, the drawing area is shown in more detail, with icons for each drawing layer. Annot a1d647c40b
