My friend has problem with it. we tried to download and install but it was not working. Below is the screen from when we try to install. A: I think that the issue is your not able to download the full Acrobat pro DC 2019.3.2. x64 from this page : From the link that I've shared you can download Acrobat Pro DC 2019.3.2. x64 but the target path is not correct I see that it is located at C:\Program Files\Adobe\Adobe Acrobat Pro DC 2019.3.2. x64\ However you can install the Acrobat Pro DC 2019.3.2. x86 version and this should fix your issue. My advice: You can try downloading the full version to a folder that you created on your computer and later you can install it without any errors. At the end of the installation process, if there are any errors, you may need to manually delete the folders that you created during the installation process. Do not forget to perform a full system scan and delete any file or malware because it will cause some system process to stop working. *Rate on the door, if there are reductions come in it as it is being paid Description Looking for a part time/ full time private chauffeur/ driver?
