Anime Batch Rename Crack Full Version Download [Mac/Win]

* Update: Added the detailed information editing feature. Views: Date Added: Mon, 08 May 2011 11:37:35 GMT Description: This plugin allows you to easily display various stats about your files in your anime lists (like the number of episodes, date added, name, year, etc). It can be used with the anime list that comes with Wingifs or you can download the latest version from our website. Views: Date Added: Mon, 09 Oct 2010 01:58:36 GMT Description: Wingifs adds several features to assist you in finding anime. These features are: Favorites: A Favorite tag is associated with every episode of every season. You can use this tag in your searches to find which episode of a season you are looking for. This tag can be used for later reference as well. If you click the "Favorites" link in the anime list, it will bring up a new window. There you can view the list of your favorites and use the "Favorite" dropdown box to select the episodes you want to have added to the favorites list. Filters: Filters are great for categorizing your anime by year, episode, sub-group, etc. You can create as many filters as you wish. The first time you use a filter, it will be saved. Each time you use the "Filters" link in the anime list, it will bring up a new window. There you can view your currently active filters and add or remove them as you wish. To add a new filter, just click the "+" button in the filters list. To remove a filter, just click on the filter's name in the list and click the "-" button. If you have a lot of anime to organize, you can create several filters to help speed things up. Tagging: You can create tags for your anime as well. As with favorites, you can use tags for later reference as well. To create a tag, just click on the "Tags" link in the anime list. You can add as many tags as you wish. To create a new tag, just click the "+" button and select the anime as the tag. To remove a tag, just click on the tag's name in the list and click the "-" button. If you have a lot of anime to organize, you can create several tags to help speed things

What's New in the Anime Batch Rename?

Anime Batch Rename is a lightweight and easy to use application designed to help you quickly rename your anime files. Anime Batch Rename can process multiple files simultaneously and allows you to set the rename pattern. Furthermore, you can use it to edit the detailed information about your files, such as season and sub-group. You can also easily update the registered properties to the latest ones. Features: Converts all of the input anime files by opening them to the default editor with the selected files. Ability to set the rename patterns and other properties. Allows you to edit the details about your anime files, such as the season and sub-group. You can import the list of anime files from a folder that you specify. You can export the list of anime files that have been renamed into a new file. Change the color theme. Introduction to the 2.0 Release This release brings several new features and improvements: New features A new simple interface. The previous interface required many clicks to change or import the settings, but the new interface allows you to change the settings just by clicking on the icons. "Auto Rename" feature. The program automatically renames the files based on the specified renaming rules. The auto rename feature works with the anime database files. New manga support. It was impossible to rename manga by using the previous version of the program, but now you can easily rename it by specifying the original name. Ability to browse to a directory instead of a file list. This is very useful in case when you are working with many files. Improved Import and Export functions. Improvements Added "Auto Convert" feature. The program automatically converts the files that you opened to the default editor to the ANI file format. This is very useful when the program crashes during the conversion process. Improved the Japanese localization. Changed the game settings. Added ability to import and export the list of anime files from the server. Improved the performance and reduced the size of the executable. Added the ability to import and export the list of manga files from the server. Added the support for the custom skins. Added the option to import the list of files from a folder. Added the option to sort files alphabetically. Added the option to edit a file's details from the main window. Added the ability to copy an anime file to the Clipboard. Added the ability to open up to eight anime files at once. Added the option to sort the imported list by the name. Added the option to show a progress bar when the renaming process is running. Added the option to show the contents of the clipboard. Added the option to make a link to the
