## What's New In Offline HTML Viewer?

The program supports IE, Firefox, Safari and many other browsers. You can use both fixed and dynamic HTML, as well as XML files. The program also allows you to preview the navigation bars of IE and Firefox. In addition, you can open a regular HTML file from the first page of the open HTML document. The user interface is in a consistent and intuitive design, while the interface is intuitive, easy to use and easy to navigate. You can edit (and even replace) specific text, change the font size and even delete individual HTML tags. You can make absolutely needed changes, such as reformatting page layouts or dealing with the page's search bar. A few other useful features include the ability to edit custom HTML tags, highlight specific text on the page, copy/paste data in the current buffer or in the Clipboard, search within the current buffer for string or number values, collapse/expand specific sections in the HTML window. Offline HTML Viewer's interface uses a "side panel" element, which allows you to manipulate and work with specific HTML elements. The program is fully compatible with Microsoft Windows NT/2000/XP/2003/Vista/7. To add more features, simply request support on the program's support site. You can also ask suggestions, offer improvements or report bugs directly to the program's creator, by joining the third-party forum on the developer's website. Before making the purchase, you can preview the software or even create a free trial. Aside from the free version, you can choose one of three basic, fully-functional and fully-equipped editions for the low price of \$9.95 / €8.95 / £7.95. The professional version may come with more features such as a printer-friendly layout, automatic scrolling and text-to-speech functionality. When it comes to features and aesthetics, the program seems to know very few limits. You can use the program to make fine-tuned changes to the page's layout, select preferred text formatting, change web font families and even edit existing HTML tags (including closing and opening tag). For quick and simple page formatting, a toolbar with buttons for all essential functions is provided. A menu from which you can choose the font type, font size, margin, border thickness and indent are directly accessible. In addition, the menus of all available options are located within the HTML panel. The program is very
