Timeline of releases The release dates are only those given by AutoCAD themselves, as even minor bug-fix releases may have been added that were not officially released at the time. The release dates are also only for the line-version (with the exception of AutoCAD 2014, which includes both the line and web editions). AutoCAD LT was initially a subversion of AutoCAD LT and had even a bug-fix release cycle. Since version 2006.x, AutoCAD LT and the Web Edition have been a subversion of AutoCAD 2015, including everything released with that version, but without the additions released after. First release: March 9, 1992 Latest release: March 15, 2019 (AutoCAD LT Web Edition 1.25.0) Line version The line versions of AutoCAD,

AutoCAD LT and Autodesk Architectural Design each had their own release cycle. The version numbers (mostly without.0) for the released editions (for example in chronological order) were: 1992 - AutoCAD 1.0 1993 - AutoCAD 2.0 1994 - AutoCAD 3.0 1995 - AutoCAD 4.0 1996 - AutoCAD 5.0 1997 - AutoCAD 6.0 1998 - AutoCAD 2000 (some time between 10.5 and 11.0) 1999 - AutoCAD 2000 AD (some time between 11.0 and 11.5) 2000 - AutoCAD 2000 for Windows 2000 - AutoCAD 2000 for Macintosh 2001 - AutoCAD 2002 2002 - AutoCAD 2003 2003 - AutoCAD 2004 2004 - AutoCAD 2005 2005 - AutoCAD 2006 2006 - AutoCAD LT 2006 - AutoCAD LT for Windows 2006 - AutoCAD LT for Mac OS X 2007 - AutoCAD LT for Web 2007 - AutoCAD LT for Windows Mobile 2007 - AutoCAD 2008 2008 - AutoCAD 2009 2009 - AutoCAD 2010 2010 - AutoCAD 2011 2011 - AutoCAD 2012 2012 - AutoCAD 2013 2013 - AutoCAD 2014 2014 - AutoCAD LT Web Edition 2015 - AutoCAD LT for Windows 2015 - AutoCAD LT for Mac OS X 2015 - AutoCAD LT for Web References External links a1d647c40b

If you want to connect to the cloud service, be sure to activate the cloud service and create an account in it. Then do all steps in the walkthrough on the bottom of the next page Q: Xcode Provisioning Program: not found I'm new to Xcode, I generated the.mobileprovision file, the "provide" is checked and I have set the bundle ID for my app. When I try to build the app, it crashes and says: dyld: Library not loaded: @rpath/libswiftCore.dylib Referenced from: /private/var/containers/Bundle/Application/2E4E765C-DE3D-4D9A-857A-A8FC5F2A1790/MYAPPS.app/MYAPPS Reason: image not found The file is in the correct location and the bundle id is identical. I'm using Xcode Version 6.4 (6E35b). A: Xcode generated a provisioning profile which contains your app name and it is embedded in the.mobileprovision. In order to be able to run the project you need to add a reference to that provisioning profile. Please follow these steps: Open the organizer on the left sidebar. On the right sidebar you can see the provisioning profiles. Click on your provisioning profile. Click on "Add to targets" Afterwards you can check the build settings of your app and make sure that the key that is referencing to your provisioning profile is set to yes. This should be enough to run your app in Xcode. Hope this helps! Q: jqueryUI buttons inside dialog When I load the following page into a dialog, I cannot get a button that was added in the dialog (when not using ajax) to fire an event. The dialog is just a wrapper around a single div, the dialog is popped up when an ajax callback returns. $(document).ready(function() { $("#dialog").dialog({
