Regardless, it is true that one doesn't have to have a photo image to convey meaning. The good news for those with deficiencies in visual acuity, or who for whatever reason simply cannot see what a caption or key image means, a number of desktop screensavers provide that vital information. Although they don't occupy your desktop as fully as an application, they still are very welcome and useful utilities. These offerings are a free, compact alternative to photo books, message boards, and the like, all of which require some additional visual attention to function. Several screensavers, including the Dropline Free Desktop Wallpaper Screen Saver, display messages to provide a certain amount of functionality. Most provide background information about a given subject, such as reference material or a geographical feature.

Others are much more in-depth. They feature articles, books, and information about a topic or holiday. In addition to being an entertaining diversion, these screensavers are useful for improving concentration.

Always at the forefront of emerging and established technologies, the Huawei Ascend Mate is set to challenge the already familiar smartphone form factor. Its flamboyant design on the outside combined with a brilliant 5-inch HD IPS 720p display, Android 4.2.2 based Ascend P1 and an amazing MediaTek MT6753 chipset should be enough to make it a must-have device for this coming holiday season. Huawei Ascend Mate Specifications With a number of smartphones from established brands such as HTC and Samsung on the market, the use of a smartphone from a non-famous manufacturer like Huawei is a different thing all together. However, that is exactly what makes the Ascend Mate stand out from the crowd. The Ascend Mate is a 5.5-inch (1280 x 720 pixels) HD display smartphone powered by a MediaTek MT6753 chipset based on the ARM Mali-T720 GPU, clocked at 1.7GHz, 1.5GHz at peak. This is one of the most powerful MediaTek chipsets released thus far as it should be able to smoothly handle any game or application under Android 4.2.2 Jelly Bean. The Ascend Mate will be available in three colors, Classic Black, Silver and Purple, with 4GB RAM, 16GB internal storage, and a microSDXC card slot. We are currently waiting for the official price to be announced, but we would guess it will be in the same region as its sister device, the Ascend P1, priced at around \$249-\$299. Huawei Ascend Mate Software The Ascend Mate is to come with Android 4.2.2 Jelly Bean that, in its turn, will bring many new and exciting features to the smartphone. As a matter of fact, Android 4.2.2 Jelly Bean is the first major version of the OS that will support the new so called 60 fps/second frame rate and the new 2D/3D graphics on the GPU and support for them on the chipset. For those who are not aware, 60 fps/second is an important metric as it essentially indicates how smooth the frame rate is. For those who do not know exactly what
