Ashampoo Home Design Product Key is the proof that you don't have to be an architect to create your dream house if you have the right tools at hand. This application comes with all the tools you need in order to put your ideas into practice and generate realistic 3D sketches of rooms, apartments and houses. Generate realistic 3D environments Not only that you can create a house from scratch, but you can also use items in the integrated library to create a complete 3D environment. This gives you the freedom to experiment with different outdoor objects (plants, rain pipes, garages, garden items, streets, chimneys) and furnish each room of the house according to your preferences. The realistic effect is enhanced by the possibility to adjust the Sun's position, which ultimately affects the lighting and the shadows. Moreover, you can freely modify the topography and adjust the terrain as you consider fit. Extended set of measurement tools and viewing options Ashampoo Home Design enables you to insert shapes and objects into your design, build doors, windows, ceilings, walls and floors, taking care of every detail. You can also create new roof designs, create stair cases and new surface elements. Users can freely interact with the design by rotating the view with the mouse, zooming in and out or changing the view mode and the perspective. The application allows text labeling and provides a variety of measurement tools for distances, polygons and angles. Create your dream house in 3D Ashampoo Home Design is a great tool for those who want to remodel or renovate their house without having an architect create the sketch. Due to its complexity, the interface might seem a bit crowded at start, but fortunately, the application comes with built-in wizards, sample projects and training videos to help you get accustomed to all its features. ASHPAAYSHMOPHOME DESIGN 3D Home Design and SketchApp lets you build and design rooms, apartments and houses from scratch. Create a complete 3D environment for your home, including building, furniture, surfaces, gardens, cars and more. Thanks to more than 50 3D objects and an extended library, every detail of your design can be realized in a realistic 3D model. You can import your photos directly into the design or use sample models. You can even create your own sample project by using a template. There are two main views to view your design: the wireframe mode and the 3D view, which you can rotate by mouse interaction. You can also choose between single and double perspective, adjust the zooming, change the length of the view, edit text labels and rotate objects by clicking on them. Finally, you can create a floor plan, a top plan and a perspective view. The 3D view is easily the most important feature, as your design will be realized in a realistic 3D environment thanks to the adjustable Sun. This will also affect the lighting and the shadows, just as if you were in the house. Measure the distance of objects and determine angles with some of the many measurement tools. You can record the measurements, create 2D drawings or use the BIM with your model. Ashampoo Home Design Features:

- More than 50 3D objects for doors, windows, ceilings, walls, garden furniture and more
- Selection between double and single perspective mode
- 3D view including rotation, perspective, zooming and adjustment of the size of the view
- Saving of a floor plan, a top plan and a perspective view
- Support for SDF/XML, SGI/STL and VRML file formats
- Text labeling for better orientation in space
- Import of 3D object and photo libraries and design control
- Export of 2D drawings for the Google Sketchup format
- Other various viewing options to fit the needs
- Import of 2D images from many sources such as FBox, PDF and DXF
- New mapping features in 3D view
- 2D and 3D models can be exported as DXF, C3D and STL files
