AutoCAD

AutoCAD Product Key is regarded as the most popular CAD program by architects and engineers. History AutoCAD first appeared in the early 1980s and was developed by Steve Georges and Stephen Prieur. Prior to the development of AutoCAD, the drafting industry was dominated by small-scale companies that used traditional pen and pencil methods. Autodesk opened AutoCAD to the public in December 1982. AutoCAD was initially available only for microcomputer-based personal computers running Microsoft Windows, with version 1.0 being the first to run on the PC-AT (later PC) and XT platforms. In March 1983, the first version of AutoCAD, 3D, was released for the Apple II, giving users the ability to create 2D and 3D drawings. The Apple II version was the first to allow for the creation of perspectives, vanishing points and vanishing lines. AutoCAD 2, launched in October 1983, allowed 3D drafting for the first time. It also included the ability to work in both 2D and 3D (dual mode). The user could switch back and forth from 2D to 3D. In November 1983, AutoCAD Release 2.0 was released for the Apple II and Atari ST. The Atari ST version was the first to allow for the creation of polylines, splines, circles and arcs. In 1984, Autodesk released its first handheld version of AutoCAD, the MiniCAD, which ran on the Apple II, Atari 800 and IBM PCjr. By 1986, the MiniCAD had been replaced with the PocketCAD, which ran on the Apple IIc. The most recent version of AutoCAD, AutoCAD LT (or simply AutoCAD LT), was launched in June 2011. AutoCAD LT is designed for small, medium, and large companies, schools, and government entities. AutoCAD LT was designed to provide the same functionality as AutoCAD, while also being more affordable. Functions AutoCAD contains a variety of functions, including drafting, modeling, 2D and 3D. AutoCAD drafting AutoCAD drafting tools include: CAD tools (drawing, shape, style, utility), dimensioning, parameterization, printing, routing, partitioning, 3D model generation, graphical input

Technical support Autodesk has published a comprehensive online technical support website. The online technical support site is available 24 hours a day and allows users to ask for help using Autodesk software, technical forums, tutorial videos, and a detailed list of contact information. An extensive tutorials section is available, along with a live chat section where users can ask questions regarding Autodesk software, which is staffed by a knowledgeable technical support team. Application platforms Autodesk started the public beta of AutoCAD on Mac OS X in 2007. AutoCAD 2009 was the first version released for Mac, available both in Mac OS X (Intel) and Intel-compatible versions. AutoCAD 2008 for Mac OS X is released as Mac-compatible Intel version, not the PowerPC version that was released in 2007. AutoCAD 2008 for Mac OS X can run on a Late 2004 iMac (Intel), MacBook Pro, or MacBook. For the first time, AutoCAD was available for the Apple iPad, in March 2011. Autodesk released the next version of AutoCAD, AutoCAD LT 2009, for Mac in the summer of 2009. In 2008, Autodesk announced a similar release strategy for Windows based versions of AutoCAD, announcing AutoCAD LT 2008 for Windows. This version was immediately made available for both 64- and 32-bit Windows, based on the client version of the new Windows platform. AutoCAD LT 2008 is now a completely 64-bit-only product. A 32-bit version is now available on the Autodesk Exchange website, though it is no longer a production version. Autodesk has released AutoCAD in a "self-contained" package for Apple iPhone. AutoCAD LT 2009 for iOS provides all the functionality of AutoCAD LT 2009 for Windows and can import, export, plot, and perform more complex drawings than the standard iPhone application. AutoCAD LT 2009 for iOS does not work with the AutoCAD LT 2008 for Windows because of file compatibility issues. Later in 2009, Autodesk released the first cross platform version of AutoCAD. AutoCAD 2009 Cross Platform is available for Windows (64-bit and 32-bit), OS X (64-bit), Linux (64-bit), and Microsoft Windows CE. AutoCAD 2009 was the first version released on the iPad. AutoCAD 2009 for iPad was available as a ca3bfb1094

Globally, the 2014 global AIDS epidemic still ranks as the most significant public health crisis. The World Health Organization estimated that 34 million people were living with HIV in 2014, and half of these individuals are still unaware of their HIV status. To end the global AIDS epidemic, the World Health Organization (WHO) included a set of "90-90-90" targets that call for 90% of people living with HIV to know their status, 90% of people with diagnosed HIV to access antiretroviral therapy (ART), and 90% of people receiving ART to achieve viral suppression. The successful achievement of the 90-90-90 targets will require improvements in the diagnosis, care, and treatment of HIV. The more individuals who are aware of their HIV infection status, the more people can access treatment and prevention. The more people receiving ART, the fewer HIV transmissions are possible. In the last year of the International AIDS Society conference, nine separate initiatives were launched to improve the HIV care cascade in low and middle-income countries (LMIC) (Lancet, p.1937, 2017). The conference concluded with the adoption of WHO recommendations for the first year of the global 90-90-90 targets in May 2017. The recommendations, which include creating a common definition for viral suppression, are expected to contribute to the growth of existing and new collaborations to address the global HIV epidemic. The conference also included the introduction of the US President's Emergency Plan for AIDS Relief (PEPFAR)-supported Global Health Outreach Collaborative (GHO). A report provided updates on the Global Health Outreach Collaborative's global network, HIV treatment programs in LMICs, and US PEPFAR programs supporting the achievement of the 90-90-90 targets. The success of the 90-90-90 targets will rely on strong collaborations among countries, institutions, funders, and other stakeholders. For instance, GHO and its partners have been working to identify and eliminate barriers to ART and HIV treatment for adults and children in LMICs. As part of GHO's work, member organizations have collaborated to engage more
