Cyber Protocol is a multi-layered cyber warfare game set in a futuristic dystopian world – where you and your squad are faced with a technologically advanced conspiracy. The game is all about a surprising attack of the entire world: it's gone online and the internet has gone mad. What is it? What is happening? Who is behind this? Why is it happening? What will happen next? You will find out as you complete missions, engage in combat, hack your enemies and enjoy the game together with your friends. Features: • An excellent story with 36 missions • 20 gorgeous hand-drawn environments • A wide variety of weapons – helicopters, tactical drones, armors, cyber-guns, land-rovers, tanks, lots of cyber-suits and more • More than 5 types of weapons can be combined to create a unique weapon • Realistic hacking • A lot of different cyber-suits • Both the story mode and the multiplayer mode take place within a completely different cyber-world. Game Mode: Story • In the story mode, you will play as an agent who works for an undercover government department – the Special Tactical Teams. You will be armed with a combination of pistols, shotguns, rifles and assault rifles – hacking tools, and friendly drones. • Don't forget to use the hacking tools: you can not only hack enemy-defenses but also create huge explosions, or use a remote control to distract the enemy with explosions or attacks on critical points. • Story missions are accompanied by an excellent voice-over. You will meet cool characters and unlock new roles as you progress through the story. • Select your weapon and take your mission. Game Mode: Multiplayer • Play offline with your friends through the classic split-screen multiplayer mode. • Use the hacking tools: you can not only hack enemy-defenses but also create huge explosions, or use a remote control to distract the enemy with explosions or attacks on critical points. • There will be various interesting variations in the multiplayer mode: control the drones, use the radar, hacking attacks and so on. • Team up with your friends and compete with them. • Accept missions and complete tasks in the world of Cyber Protocol. DEVICE REQUIREMENTS It is important to mention the requirements of the game to work properly. Minimum: OS: Windows XP, Vista, 7, 8, 10 Processor: 1.6 GHz or higher Memory: 128
