The move is the first time Russian forces have fired cruise missiles since August, when Russia suspended a nationwide moratorium on the missiles following a September U.S. strike against Syria. Russia briefly resumed firing them in October. Russia has placed the Nov. 9 referendum on Crimea's independence as a condition for Syrian President Bashar Assad remaining in power. The Russian government has said it intends to evacuate 15,000 of the 50,000 troops it has in the country, reducing Moscow's military footprint from nearly 2,000 to about 1,500. The withdrawal would be timed with the planned removal of Assad. Russia has been conducting a military campaign in the country against rebel groups, which it says are receiving support from U.S. and other countries. Russian Defense Minister Sergei Shoigu said in December that Moscow was not planning to deploy any troops to Syrian territory after the withdrawal of its forces. The move to fire the cruise missiles comes as U.S.-backed forces close in on Aleppo city, which Russia considers Syria's most important urban stronghold. a shared culture of telling the truth, in the public discourse, and in this

The concept, the flow, the colorful animation; everything is perfect. If I had to complain about anything, I'd say that the boss battle scenes can be a bit overwhelming, which can make combat a bit dull. Still, it's rare that we see such a well thought out and polished game. If you're a fan of the series, I can't recommend the game enough. You can pick it up for under \$10 if you're interested in this genre. The amount of things you can do in this game is incredible. The world is a bit limited, but it comes across as vast, and the quests that you follow through are immensely satisfying, regardless of the outcome. On top of that, the combat feels much more fluid than in previous games, as is to be expected. The battle system is certainly a nice touch, and really helps to bring everything together. As a whole, it's actually in the top tier of 2D games currently. If you're looking for an addictive, action-packed game that you can play for hours without getting bored, then I'd definitely recommend this game. In this new world where she's been thrust into, she will learn what it means to be reborn. The concept, the flow, the colorful animation; everything is perfect.
