Elden Ring is a fantasy action RPG where you can choose your own path and create your own destiny. The game is set in a vast world where the player has to take on different roles as a warrior, mage, merchant, or any other "Elden Lord" they want to be. You can freely customize your character from their appearance to their skills and weapons. Because of this, Elden Ring allows you to develop your character into their own unique play style! Each time you complete a quest or defeat a foe, you'll receive a Spirit Stone. Use these stones to transform them into various items, which can be equipped. Create your own unique items by combining up to four pieces of gear in each item. Learn to master your abilities, revive your fallen comrades, and use items to overcome your enemies. Items Equip from 01 to 15 pieces of gear to create up to 15 item slots. High levels of weapon, armor, and magical attributes are crucial in combat. Because of this, your item build (i.e. the configuration of gear equipped) has a big impact on your combat performance. Weapons Using weapons gives you various bonuses, but they will consume the available attribute points when you activate them. They have different attributes, attack speed, and properties to choose from. The evolution of your weapons will be reflected in your stats. You can increase the attributes of weapons, use faster attacks, and add additional properties. Items of the same type will share the same properties. If you equip the same item with a different weapon, you can use the properties that the item supports. Magic With magic, you can increase your skills in fighting, summoning, and magical abilities. Magic will consume attribute points depending on the level of the abilities. Item Evolution By combining the items you will receive from quests and treasure chests, you can advance your own items by adding new items. When you give an item a new item slot, you'll add a random new item from the item pool to the current item. Items will evolve once per day for the first four days of the game, after which they evolve continuously until level 25. Skill Evolution The skills you have are considered the most important factor in battle, and they influence your in-game stats. The item slot, experience, and items you have equipped all affect the various skills that you

AR Sword The latest AR sword is set in a fictional country where cyber evolution has crossed over into reality. People who upgrade their bodies in the magnetic world, AR world, are called AR painters. Using data obtained from the electric field environment, such as objects, the user's emotions, and others, they can project photos and data for the AR world. In this world, people have a very relaxed and somewhat extravagant society. You can enjoy the unexpected encounter with the people of this multi-dimensional, gaze 4. Omg... Please react and like! Apple Store and Google Play Store. Check out the video trailer! Hello,

Please be so kind to react this video!

This is an AR imitation game.

In the video I present myself super-tall, the wristband come with all functions and the Kobe ETR32 as the camera.

I'm sorry for any grammar mistake, english is not my native language, please forgive me!

(For those who would like to understand, is a ARdroid or reference of AR technology.)

r Scroll or Dragon Quest RPG-like game?

Elder Scrolls and Dragon Quest games are known for their rich storylines and beautiful artwork which can also be found in Elden Ring.

Dragon Quest and Elder Scroll books will be added in the future, as well as the possibility of an action RPG. So, if you're tired of the standard RPG, Elden Ring is the action-RPG that all RPG fans should try.

Setting up the mySql Dump generator I'm trying to setup mySql dump (forge) on the example table... but I'm having trouble. The example table is created like in the create.sql file under section called CREATE TABLE, there is a line like this insert into chats (id,chat_text) values (null,'bla bla bla...'); For some reason, this

gives an error when I execute the create.sql file, saying: You have an error in your SQL syntax; check the manual that corresponds to your MySQL server version for the right syntax to use near 'insert into chats (id,chat_text) values (1, 'bla bla bla...'' If I remove the insert statement, creation is all right, but I would like to generate the dump in a suitable fashion, cause my set-up is running on Windows 7. I just havent got dumps for it yet, cause I use the database without database user. Is there a proper way to do this? I'm using Mac pro
