I am trying to access my SAP Business One account (accounting, compensation, HR) through my Android phone to check some prior year numbers on my time sheet. The Android app is slow and buggy, and I would rather just log into the SAP Business One account and get the data, and export to CSV. Is there an offline version of SAP Business One for Android? A: Not exactly what you are looking for, but there is a built-in feature in the app called "Reconcile" (On the Hub of the app) that automatically sync all the local fields to the live data, but I think you will have to be logged in for the sync to kick in. Q: What is the difference between GEE and GIS? Google Earth Engine and Google ArcGIS seem to be two completely different things to me. However, I am not a GIS specialist or a GIS software engineer. So, I am just wondering, what is the difference between GEE and GIS? A: Earth Engine is a subset of GEE. Earth Engine is an open source product that Google develops. GEE is a product by Google that integrates multiple external

Directing the evolution of a useful, spontaneous single-dominant allele in Brassica napus. CRISPR/Cas9 technology has been successfully used to direct the evolution of mutations in the genome of crop plants. We show that the most successful modification events in a CRISPR/Cas9-mediated genome editing experiment to date were induced by a single-dominant mutation in a Brassica napus genome. We identified the causal mutation in a B. napus DH line using whole genome resequencing and high-resolution melting analysis. We predicted a double-strand break at the mutation site, and showed that the mutation was caused by a single-dominant and independent CRISPR/Cas9 induced mutation. Our results demonstrated that the CRISPR/Cas9 induced mutation frequency in B. napus is similar to the reported mutation frequency in the genomes of other crop species, including rice and Arabidopsis.
