- **New Stance animation system** - While there's no new Copa América goalscorers, there is lots of new Copa América goalscorers. We spent time trying to improve the realism of the movement of players (especially midfielders) during set-pieces, where 80% of ball possession is lost as players are trying to change their direction.
- **World Class Opposition** - Players have the portraits of other global stars to help you identify your opposition.
- **New animation de-clutter system** - Keep your animations clean and simple.
- **Show Paints vs. Show Grass** - The all-new Team Styles from FIFA 21 are back. Choose from eight romanized languages and bring your team to the next level!
- **New build customization** - When you watch a favorite player like Wesley Sneijder fly through space, do you think that every moment of his game was perfect? It wasn't. Today, FIFA 22 players can take inspiration from the greats by injecting the ability to view the animations of their game during a match. It's a process that takes place in real time and it currently cannot be disabled. This new tool allows players to learn from all the mistakes made throughout matches on the fly and they will be able to conduct advanced data studies from all play by play users.
