Smarter AI The game's smarter AI is aimed at replicating the multiple personalities of a single player. The new AI is more instinctive, allowing players to perform in new ways. Overcoming the new physical challenges is not more of a mental challenge for the game, but relies on abilities that the player uses every day in real life. Within gameplay systems, the ball physics have been changed to improve ball speed and ball control. Accurate Shot Control Accuracy of shots has been improved in FIFA 17. A new shooting system has been added and allows the player to shift his body weight towards the ball, improve his release and make quicker, more precise shots. The new ball physics provide more accurate and skilled shot control. When playing in 2 vs. 2 matches, you can use 2 players, Double AI Shooting, and the game's AI strikers hit the

---

target with more often than ever before. Double AI Shooting can be activated in 5 game modes, including all modes in Ultimate Team. Double AI Shooting will be available for FIFA 17 when it's released. World Cup Set-up These changes were introduced in 2014 when the FIFA World Cup was set up in Brazil. Some of these changes are now available through a 'World Cup Mode' for Franchise Mode and Ultimate Team. More action in AI Evolution As in the FIFA 14 update, each player is smarter. They will now react more quickly when they read a pass more aggressively, and when they get a red card they will make more precise off-ball runs. When receiving a red card, they will also be able to make a more precise off-ball run, and they will be more likely to make a deeper run in behind the defenders. AI in Training During training, all players will now be more intelligent in movements and making decisions. When passing, they will pass the ball more in the right direction, which will increase the distance the ball covers when passing. These changes will improve the speed of the game during training. With a new level of sophistication, the game's AI strikers will also be more aggressive during training. They will use their physical attributes more to spot a more

---

precise pass and make quick movement off-ball to receive the pass. New Combo Blocking in Training We now allow players to use specific combinations

#### What's new:

- **HyperMotion Technology (HT).** Using motion capture data collected from real players playing a complete, high-intensity football match in motion capture suits, FIFA 22 allows you to control your players with a new level of accuracy. Create your own attacking style with an increased number of control options and formations that adapt to the positions of your players. Focus on passing and interception as the new Kill & Run foul system rewards players who pass and run at defenders.
- **Fully customizable transfers.** Manage your squad and take advantage of fully customizable transfer options, including balancing additional benefits for summer or winter transfers.
- **Player Impact Engine.** Enhanced playstyle impacts including new heuristics that reward players who dictate

---

the pace of the match, create tension and aid your tactical play.

- **Revamped Live Challenges.** Challenge your friends through active P2P and online events that make your club's progress count.
- **Create your own career.** Keep your player's creative flair and earn your way into the world's best leagues. Employ a wide array of skills and traits to mix and match your style.
- **Enhanced commentary, script and production.** Live commentating from award-winning analysts World Cup winner Ian Darke, Xavi Hernández, and guest commentary by D. Martin Renger. For the first time, the full game is being scored by an all-star studio of film music composers and leading scorers.
- **New locations.** Authentic stadiums from around the globe will transport you to the game, including brand new locations such as Celtic Park in Scotland.
- **New formations.** New specialist formations make use of different styles of play, from a diamond-shaped midfield to a three-at-the-back shape.
- **New editor animations.** FIFA editor animations have been reworked, while 4 new edit animations, including the howler, shortcut, and 40- yard free kick, were also created.
