This Side is about two friends that need help each other to find a way out of a dangerous place. In the future, we aim to increase the amount of information about the place and tell the players what happens there.

**Key Features**

**Gameplay: Co-Op Gameplay** The player needs to help his friend while facing difficulties in finding his way out of the mines. In the future, we aim to increase the amount of information about the place and tell the players what happens there.

**Survival Gameplay** Both players in the future will have survival mechanics based on their own environment. These mechanics will be based on their own environment and the idea behind that is not to flood the player by resources administration but make the sense of surviving more believable. (Check the "About the game" section for more info.)

**Roguelike Gameplay** The game is made in a roguelike experience but with procedural changes and other improvements. The game will have another two play sides inside and outside the mines. Inside the Mines, the player faces the hazardous environment of an abandoned mine. For now, the player needs to find his way through the mine, while facing cave collapsing and flooded areas. He also needs to be helped by the outside player who provides resources like heals and paint sprays. Our goal with the final experience is to make it's struggling and visceral like a real survival experience inside a confusing and dangerous place. (Check the "About the game" section for more info.)

**Storyline** The player will be transported to the mines. The game starts with the player, not knowing he's transported there. In the future, the player will find himself in an unmapped place to better help his friend inside the mine he put his pain on his friend shoulders. He also faces environmental hazardous like storms and lightning that can strike him at any time. Our goal with the final experience is to make frightening by the need for help while one player faces the struggle inside the mine he put his pain on his friend shoulders. (Check the "About the game" section for more info.)

**Interface** There will be two UI options. The first one is a top-down map that will show the player where the other player is located. It will also show other information about the situation like your health and the objectives for that level. The second one is a UI that will display all the objective objectives in the game for the player. The main idea is to be simple so players can easily understand the game mechanics and easily keep track of their objective.

## **Features Key:**

- 
- **Multiple Environments**
  - **Multiple Characters**
  - **Multiple Levels**
  - **Multiple Special Enemies**
  - **Various Difficulty Levels**

from the Microsoft Store. Is this game 'for PC' or 'for Nintendo Switch' or can it be played on either platform? I have an xbox one...is it the same for that one? ### What's new:

**ale from Zodiak Digital was great and we loved it! What I didn't like was the switch from SuperPlay to Zodiak Digital and how that has affected the Zodiak Digital and the Worlds. From what I understand, Zodiak Digital did with the Demo booth problems and it must have cost Axess a lot of sponsorship dollars or they wouldn't have decided to go that route. It also did not affect the National Tourystale that was provided by Excel Sports. Our National Tourystale was a bit disorganized while I was still trying to comprehend what was going on to begin with, but Excel Sports worked really, really hard this year for the amount of people we had. They always provided a great tourystale with the Division 1 Families and gave out a GREAT shirt! Metagame Update on Players Before we start talking about the National Tourystale we were given, we should talk a bit about the metagame for both divisions. We can look at the Team FOUR 2014 Season here for Division 1 and here for Division 2. You can see that even though the Nationals were being held at the same time, the Nationals Team and Division 2 were relatively DIFFERENT than Division 1 this year. Though, the meta games during the telecast of the Nationals were actually very similar for both divisions. The baseline for this event was Pokémon Ultra Sun and Ultra Moon. Pokémon from all prior generations of the Pokémon Sun & Pokémon Moon series were not eligible to be used this year for anything and Pokémon from previous Generations weren't a surprise, but Pokémon from Sun and Moon were new and different and we knew were going to see some completely different metagames being played. Division 1 Item Defenses - It wasn't surprising to see players running People Eater, Foolish Flunk, Exclamation Wish and Leviair Legacy from the XY Series, but it was nice to see people still using the new generation of Items, such as the Glare Shoes and the Z-Crystals. When I asked people if they were going to use Z-Crystals they said a resounding, "NO!!!". Aside from a few**
