Bambang Abdul Azizan's tweets on his time spent with the family of late Indonesian President Gambian nationals, family and friends all cross over to Indonesia to attend memorial ceremony.Residents of the Islands of Pusukan have safely crossed over to Gadung to attend the memorial service for late. Gambia lost more lives in the recent stampede at a cemetery as most deaths occurred. You could make the argument that steam trains could have taken over Canada and most of the US, and we would be living in a much worse state today, but for one reason or another they never did. The fact that Indian Railways still uses the rails that were there prior to electrification shows that we have miles and miles of dedicated tracks. Surely, the Canadian power and engineering companies could have had those long before the 70's. With such a big portion of the world is being wired up for the internet, the future seems bright and the internet will continue to grow and expand in a non-linear way. If a new form of energy is found to replace fossil fuels, will the infrastructure be able to accommodate? I don't think that the answer is anywhere near ready. As long as fossil fuels are used for power generation and fuel for vehicles there is no viable alternative in sight, and I don't think that will change anytime soon. Not with global warming to deal with and more people on the planet. Yes there

is another obvious alternative, but it's expensive and it's not really applicable to the US. You said "...would we have electric cars today if we didn't have reliable fuel for cars?" Easy answer: No, cars would not exist anymore. People would use horses. I can not imagine how people would travel with horses and carts, and transport them for long distances. The question was about electric power. In the early days of steam power there were so many things about it that were not perfect. Currently we have safe, clean, efficient electric powered train systems. And they are still developing technologies. If steam were to

be used for electric power, we would probably still have a lot of inventions with steam power that are a part of our daily lives.Q

Mekanika Tanah 2 Hary Christady Hardiyatmo.Q: How to Add ToWorkflow Status I am currently working on SharePoint 2013 Framework and I would like to create a Task Status. How should I go about this? When I add it via a custom button, it doesn't appear on the ribbon. A: You should add your Task status in the Workflows ribbon control in your page. The code for it is located in a file SharePointProjectTemplates\Workflows\RibbonControls\RibbonWorkflows.
