

More tutorial: PWS32.exe PE/Setup and PWS32.EXEQ: Why is the encoding of DataFrame column from Decimal to String I do a convert to int in my code and then type conversion back to Decimal. The strange thing is, when I look at the column which was the int column, it is a Decimal type. Why is that happening? Here is the code: DataFrame df = new DataFrame("n", Arrays.asList("l", "m", "h", "m", "h", "l", "h", "l", "m", "h")); df.registerTempTable("df"); DataFrame output = sqlContext.sql("SELECT \* FROM df"); output.show(); output.printSchema(); int l = output.col("l").getInt(0); int m = output.col("m").getInt(0); int h = output.col("h").getInt(0); Output: +-----+----+----+ + |l |m |h | +-----+----+----+ +-----+ |ColsExpr | +-----+ |ColRef | +-----+ +-----+----+----+ + |l |m |h | +-----+----+----+ +-----+ |ConstraintsExpr| +-----+ +-----+ |l | +-----+ +-----+ |m | +-----+ +-----+ |h | +-----+ +-----+ |l | +-----+ +-----+ |h | +-----+ A: The default encoding of strings is unicode, but the default encoding of numeric values is int, which explains why you see all integers as strings. You can change the default codec to integer via: scala> import java.nio.charset.Charset import java.nio.charset. 1cdb3666d

Download Remove WAT V2.2.5.2 Windows 7 Activation.rar free.removewat v2.2.5.2 - Windows 7 Activation WindowsÂ . Windows 7 Activation RemoveWAT v2.2.5.2 (x86/x64) by Hazar Build Date: March 02, 2010. All Windows 7 versions are supported. Windows Server 2008 R2 Editions supported. So today I was talking to my friend Lucy about "The Wizard of Oz" and how to make it more modern in a way. I don't think anyone would argue that the movie is over the top on pretty much every level. But then, my next thought was that there is a scene in the film where the witches take Ozma (or is it Glinda) and have her strip naked down to a sheet that merely covers her. Now I didn't really understand why everyone was acting like this was all in the same day. How does her physical appearance change the "tone" and "humor" of the scene? I had no idea whether that was an actual thing people were talking about, because it only came up in conversation... but I went ahead and Googled it... you'll see what I found there: Right! THIS is how it is talked about? I would say this has to have been entirely a product of my friend's imagination. That's why I said I had no idea. Obviously if anyone at Warner Brothers were saying that this was the actual thing they were filming, it would have been made very clear. But I digress... that's not even the most entertaining part of this blog. I've got a lot to tell you about. Like how the fine white dust that constitutes most of the film is actually made of the sand that makes up the deserts of North Africa. Or how the "red clump" is actually the planet Mars. Or how the entire focus of the film's climactic sequence is completely non-sequitur-based. But that's for a future blog post. To get all of that out of the way, I'm going to give you a brief rundown of the things I found out today. (Hint: It's a lot.) First, I know that the source material (the original L. Frank Baum
