Hey guys, sorry to hear my last comment didn't really make sense so i want to clarify a few things here (Like I said I am new to this modding so don't fault me on my words) The underwater combat is going to be entirely.1. Field of the Invention The present invention relates to a ring laser gyroscope and a method for manufacturing the same, and more particularly to a ring laser gyroscope and a method for manufacturing the same which is suitable for practical use as a high-accuracy, high-sensitivity gyroscope. 2. Related Background Art Hitherto, ring laser gyroscopes have been developed as detecting devices for detecting the angular velocity of rotation. In these ring laser gyroscopes, a ring laser oscillator is formed by suspending a two-dimensionally-molded concave mirror (or a two-dimensionally-molded straight mirror) with a two-dimensionally-molded fixed substrate by a torsion structure. In a conventional ring laser gyroscope, light beams emitted from a light source are respectively applied to the opposite ends of the laser resonator, and the magnitude of the oscillation frequency is detected as rotation detection signals. FIG. 1 of the accompanying drawings illustrates the configuration of a ring laser gyroscope as a prior art example. This ring laser gyroscope (which will be referred to as a "prior art" hereinafter) comprises a laser resonator having a two-dimensionally-molded concave mirror 10 suspended by a two-dimensionally-molded fixed substrate 12 through a torsion structure 11, a pair of light sources 14 and 15 for applying laser beams to the opposite ends of the laser resonator, driving means 16 for driving the light sources 14 and 15, a pair of light-receiving elements 17 and 18 for converting into electric signals the laser beams branched out by the laser resonator, and
