## **What's new in Solitaire: Learn Chemistry:**

**on PC can be yours for the not so low price of ONLY \$3.99 on the Google Play Store, which is a slap in the face for all the people who wanted this for the Nintendo 3DS (we have similar \$6.99 on Amiibo). It makes no sense that the same game, Portal 2, has way more sales than this. The game is a DSiWare, a very limited game. The original version of Labyrinths of the World that was released for the Nintendo 3DS had a ton of bugs and a botched attempt at the level design. I believe this Collector's Edition version includes the additional levels, but getting the original costs way more than just \$3.99. If you want to check out more games that cost less than \$5 but are still extremely good, here's a list of some well-reviewed games: Reasons why this is good? It costs a lot, it is for the 3DS, and no one buys it anyways. It would be cheaper to see this on Nintendo Switch, but why bother? Besides, it is enjoyable whether they release it or not, I'd rather just go down with The Legend of Zelda: Breath of the Wild and laugh. Of course, I only got this due to the negative comments in the thread about buying anything 3DS for the upcoming price drop, but the comments are correct: this was a mass release for the Nintendo 3DS by a company that probably no longer exists. The video shows 10 games that are no longer due for release on the Nintendo 3DS' small market in countries such as Australia, or are simply very expensive for such a small game market. I don't know where the 'free' games are on this list. I'm thinking #7 is actually supposed to be some kind of remaster of #6. #8 I assume is remake of #5. So here's the games: Portal- 2/Loom- 2/Sam and Max: The Devil's Playhouse- 13/Cool-12/Assemble the Squigs- 8/Olli-08/Steel Blue- 12/Robot Buckets-3/Surgeon Simulator- 5/Bit.Trip- 7/Ace Combat- 7/Globulous- 10/Darkest Dungeon- 5/Born of Light- 8/Pierce The Veil- 6/Gothic- 3/GRAVITY DAZE- 9/1080-IL/**
