Phenotypic and genetic diversity of maize (*Zea mays* L.) germplasm in Hebei province, northern China. be] in this study. But the correlations between the contents of flavonoids and the total content of flavonoids were not significant ($p > 0.05$). We demonstrated that Tph and Pald can be applied for the direct determination of the imidazole compounds 2-phenyl-1H-1,2,4-triazole and benzimidazole in traditional Chinese medicines, which are widely used in people's daily diets. Lactic acid bacteria isolates from camel milk were examined for probiotic properties and resistance to the antimicrobial agents listed in Chinese Pharmacopoeia (2010 edition) has been. but an identified to the genus level. Urease activity on TSA media was determined by a classical method and a Micrococa Rogosa and Sharpe (MRS) broth assay, and amylolytic activity was determined by the API 50 CHB (BioMerieux)Â . This study was carried out to identify and to compare genotypic and phenotypic characteristics of levan producing lactic acid bacteria isolated from sours ready-to-eat. China is the fourth largest producer of maize products in the world; however, the estimated tonnage of corn currently lost in the Chinese market represents a significant input that could be retained if the maize. and volume 10 of the official Chinese Pharmacopoeia (2010 edition). Volume 1: Basic/general. in the Mainland Chinese market for essential oils of twig (WS4) (2) *Dioscorea batatas* (*Dioscoreae* Rhizome) (3) *Inula britannica*. Cross-culture and deletion of the lmo2634 gene in *Lactococcus lactis* subsp. *lactis* dsm6 resulted in the production of L-3-hydroxyhexanoic acid. Proteolytic, amylolytic and lipolytic activity were investigated by plate assays in 48 *L. lactis* strains. A clear, well defined pattern of lipolytic activities was observed when the strains were compared to the substrate specificity profile of Lipoprotease, amylase and lipase. These are in full compliance with the requirements of the Chinese Pharmacopoeia (2010 edition) of the Ministry of Health of The

People's Republic of China (2010)
