Unveil the story of the Sekimeiya family when it is left to a daughter who's relatives broke apart. As the plot unravels, the beast's place in the house changes, leading to new emotional reactions. Within that heart of darkness is a beautiful dream waiting to be granted. As you explore the world of Sekimeiya, a long forgotten game is found in the ruins of an old home. As players play, the world of Sekimeiya opens up to them. Sekimeiya: Spun Glass is a new style of adventure game in which you create a whole new fictional world by interacting with the elements around you. Create and manipulate the environment by controlling the wind, the stars, the light, and so on. Blend them together and build the setting. I had to learn a lot of things, especially about art, video games, and other art forms. The biggest challenge was trying to balance the fundamental desires of the game with the needs of its players. Some of these desires turned out to be very similar to the ones that the game is based on, but others were diametrically opposed to that." Trailer: (In Development) Site: HKS.io Playable: Yes -Gameplay- Experience living the life of the high society of the country of Kohime. Enjoy this short story about love, society, and life in an air-headed world. Take on various unique encounters to experience the world of the high society. -Story- It has been ten years since the death of the emperor of Kohime and the country has been in chaos. A certain man born into the country's highest class rises to power and takes the role of emperor. The people around him, from the nobles to the commoners, become devoted to the new emperor. However, behind the tranquil exterior lies a soul of a man with a dark secret. He has a collection of beautiful young girls who were chosen as treasures by the people, and he holds them hostage. What kind of relationship does a corrupt emperor have with a bunch of kidnapped girls? -Features- First of all, this is a game about a man, with a significant focus on his personality and actions. The player plays as the emperor, who finds himself stuck in a world of power and corruption. Unlike other games where the protagonist has no ability to do anything and the gameplay mostly consists of fetch quests, The Sekimeiya places the player in a role as a powerful ruler with the ability to possess objects, transform into other characters, and manipulate the environment with powerful magic. This game is also a story-driven game. After choosing which girl the player wants to possess, you will receive various requests to complete. At the same time, various things will happen in the village, and you will receive more quests from the people around you. As you progress through the story, you will unlock new items and items which affect the surroundings, and you will be able to find new girls. Furthermore, if you possess a girl, she will make a request for you at the end of the game. The girl's request determines the ending of the game. -Game Mechanics- There are different types of quests. Some are easy, while others are much harder. In order to succeed, there is a need to develop a variety of skills. 1. Possess items- The game places emphasis on being able to utilize items for every step. There are a variety of items such as bombs,

Developer's Guide to: Spun Glass Written by: Andrew Hazelden Creating a game means choosing certain properties of your game: your art style, your game play, the narrative, the graphics, and so on. If your game has no art style, no gameplay, no narrative or any other value, then you shouldn't call yourself a game developer. When it comes to art style, you are highly responsible for owning your art direction. It is based on you and your organization. Your narrative is the story of the game. It doesn't mean the game has some sort of obvious narrative and you've just got to fill it in. Narrative in Spun Glass means telling the story the way you want it to be told, which includes all directions at all times. As with narrative, you are the author of the gameplay. Even if your gameplay doesn't have any content, you define the things that you want your game to do. Wherever you look, game development is a thing only someone can do. If you think you can make a game, you are just a fool. Most "game developers" can't even recognize if a game isn't a game or not. So, the question is: why would you develop something when others will make a game out of it? The reason: your game fits the idea perfectly! Playing a game is an awesome experience. No one has ever played a game before that they didn't enjoy. I can't imagine someone playing a game where they never like a game. Why? Because you have nothing to offer to make it enjoyable. Game development is about understanding the kind of players that want the game. Easy games should only have an easy difficulty level. Puzzle games should have puzzles. The point of such games is that they are quick to learn and provide a nice reward when you are ready to progress through the puzzle. In Spun Glass, we've played Puzzle games for years. We had a bunch of screenshots involving changing colors. We had some puzzle solving. We had a cute story. We had a storyboard, assets and some pixelart- but it all felt like we were just adding little more than a lot of things to an existing core gaming experience. We had no interesting
