Shop for The Sinking City - Adventure DLC Game Keys on eBay.Q: Make an NDK or Library Project I am trying to make an Android NDK or library project (Gambas version is not necessary). I am using Eclipse Kepler and Gambas API 17. I got an error A problem occurred. There is a problem parsing XML document from URL The error is: Unknown element, 'com.google.gwt.resources.client.impl.ResourceImpl' In Gambas sources at I can see there is no gwt-xxx.xml or gwt-resources.xml I followed the instruction in but I still have the same problem. How to make an NDK or library project? How to import or build Gambas in an NDK or library project? A: You can now do it in new version: There is some script to help you do it. It's pretty straightforward: 1) Download and unzip this file. 2) Set your default project directory to the Gambas directory, so it'll look like you have /data/data/your_package_name/data/sd/your_package_name. You may need to set it under preferences. 3) Add your library project as normal. 4) Rebuild it. 5) Enjoy.
