File Hash Generator
Product Key is a small software application whose purpose is to help you verify the integrity of files by generating hashes for any files stored on your computer. In addition, the tool is able to make comparisons between the generated values against user-defined hashes.

Easy-to-decode layout
The utility boasts a clean and intuitive design that

reveals a well-structured suite of features. There's no support for a help manual, but you can get an idea about how to set up the dedicated parameters in a short amount of time. Files can be imported in the working environment using the built-in browse button or drag-and-drop support. Generate hash values Waf File Hash Generator offers you the possibility to simply add

the target item in order to check out its hash value. What's more, the application is able to display different types of hashes, namely SHA1, MD5, SHA512, and SHA256. You just need to pick the preferred hash type. You are given the freedom to compare the generate hash value against user-specified ones in order to check if they match. Other important configuration

settings worth being mentioned enable you to copy the generated hash value to the clipboard so you can quickly transfer it into other third-party programs, paste custom hash values from the clipboard to make comparisons, as well as change the view mode from hexadecimal to Base64 encoding. Waf File Hash Generator does not delete previously generated hash values

from the main window so it's pretty easy to keep track of past tasks. Plus, it lets you make use of batch actions in order to create hash values for multiple items simultaneously. Tests have pointed out that the utility carries out jobs quickly and without errors. It remains light on system resources so the overall performance of the system is not affected. Final remarks To

sum things up, Waf File Hash Generator provides a straightforward and efficient software solution for helping you create hashes, and can be tweaked by less experienced users and professionals alike. It remains light on system resources so the overall performance of

the system is not affected. By Stephen Hi, I've installed a new program called 'Wafer File Hash' and it appears to be working fine so far. I'm now looking to try to generate a hash on a file that is not currently open. I can't find any way to generate a hash on a file that doesn't exist. It doesn't appear to be an option. By Master Thanks a lot for sharing this one. It's very useful for any

application. By Damiá
Thanks for a pretty good
post. I got to use this tool
successfully
