Functional Programming with AutoLISP A functional programming language, AutoLISP, is used to automate AutoCAD Product Key from the most basic tasks to the most complex. It uses the concept of Lisp macros to create, edit, evaluate and expand AutoCAD code. AutoLISP is a Lisp dialect, that is, it is inspired by the syntax and language concepts used in LISP (List Processing). For example, in AutoLISP, the arrow symbol (->) is used to create lists, the ampersand (&) represents mathematical binary operations, while the set symbol (SET) is used to define named variables. Visual LISP Visual LISP is an extension of the traditional Lisp language used for programming in AutoCAD. VLISP lets the user define functions, view the source code, view the compilation log and modify source code.
