Opis The Premises: -Lead a small and agile administration unit in a body of one to one-and-a-half thousand elite national guard troops. -Your responsibility as an officer is to make the unit assume dangerous missions that the Organization will promote to the front lines. -In order to successfully complete your assignments and earn promotions, you must exert your courage and skill during a crisis at any cost. -Must Select a max of 3 of your subordinates to fight alongside you. -Those subordinates will be denoted by their level and their school type. -Each Level brings a rank up, better offensive/defensive/speed stats and higher stats for the advantage skills available for your units. -Each branch of school has different benefit stats so if you have a mix of schools, then the 3 units might focus on different stats, or perhaps a variety. -Hire characters as your subordinates but keep a limit of 3 at once for balance. -Keep your enemies confused by killing Rares and you can get more money by bankg. -Chances at getting more rare ranks will be better so assign 1-3 guys for the repetition at a time. -Battle might be against a single character, a large group with allies, or a large group of enemies. -You can use rewards from battle to play minigames and purchase content for your subordinates and area.

-Battle Skills from zone boss abilities to castle battle high difficulty skills.
