It was initially designed to support the customization of AutoCAD. ObjectARX is designed to give users the power to customize and manage their 3D models. Users are able to place objects into their 3D model by modifying the position, rotation and size of the objects. This includes objects in both 2D and 3D views. Users are also able to add other new objects into their design such as text, logos and brands, lines, closed and open loops, path, and extrusions. The 3D model is then saved in DXF format.
