Usagi Yojimbo: Way of the Ronin is a 2005 American martial arts action comedy-fantasy film written, produced, and directed by Oren Peli. The film stars Ian Ziering as the titular Usagi Yojimbo, a red-socks-wearing ersatz samurai who fights criminals with a katana sword. Peli and the film's co-writer Jay Boberg also co-produced the film alongside Will Packer, the director of Universal's The Fast and the Furious film series and producer of the Oscar-winning comedy-drama drama Crash. Peli had been exploring the idea of adapting the science fiction comic book character as a feature film since a chance encounter with Steve Niles, the artist who illustrated the comic, at a comic book convention in 2004; Niles later introduced Peli to author and illustrator Scott Adams, with whom he shared the rights for the character. Together, Peli and Adams developed the plot for the film, with Adams serving as executive producer. George A. Romero provided his voice for a character made up solely for the film; he reprised the role in the comic book. Usagi Yojimbo: Way of the Ronin was released theatrically on July 26, 2005 by Miramax Films and 20th Century Fox. It grossed over \$60 million worldwide, despite its B-grade rating from Rottentomatoes.com, a website for film critics and contributors. Plot In the late 19th century, samurai named Abe and his servant Mutsu marooned on the island of a small, isolated town had their dreams of adventure and freedom crushed by the forced labor, strict discipline and increased bigotry that they faced upon arriving. Though the two were making a good living and did not care, Abe suffered from amnesia and cannot remember any of his identity. He is committed to a mental asylum, while Mutsu sold his master's sword to a leather salesman and joined the local sheriff's department as a bobby. Abe seeks to escape his fate, and cunningly uses the jacket of the guard on the asylum, "Brad", who is dedicated to his job, to gain entry to the facility. As Abe prepares to attack Brad, the sheriff arrives and gives him a second chance to change his fate. The two gain the loyalty of the sheriff and his deputy, Sally, and find the people of the town inexplicably

Cave Crawler is a platforming game in a retro-inspired environment. You play a protagonist who dig tunnels beneath a strangely enchanting world. The landscape and enemies were designed using the stylus (or even a finger) with no onscreen buttons. LEVELS: - It's Not A Trap - The protagonist falls through an enemy-filled hole and must find his way back. - Toxic Acid - In this level, the protagonist must avoid the enemies while collecting the crystals to collect a flag. - Haunted Ruins - As a fog of darkness descends, you must find the enemies and the switch to turn off the dungeon's generator. - Almost Boring - In this platformer, the protagonist must avoid the enemies, collect a rod, and use it to open the door to a secret area. - Treasure Trove - As the air clears, you are joined by a helpful companion. Treasure chests can be opened to find seeds that allows you to unlock secret levels. THEME: Cave Crawler is designed to be played with a stylus and no buttons at all. You can dig tunnels, collect treasure, and battle enemies to progress. The world is designed to be played with all of your fingers, not a stylus. The point is to have fun with your stylus in one hand and your fingers in the other. To play, simply press your stylus into a level to start digging. You can use your stylus to punch holes, break blocks, flip switches, change the room's theme, and shoot cannonballs at enemies. The left and right buttons are used to change theme, and the bottom button shoots cannonballs. Even if you're playing on a touchscreen device, it feels natural, like you're controlling a classic game console. KEY FEATURES: - Stylus gameplay - Retro-inspired art, music, and sound effects - No onscreen buttons - Only use a stylus - Fun-filled action - Challenging platforming challenges - Playable on a smartphone or tablet DEVELOPER: Cave Crawler is made using Unity 5.3.1.
