Darkness and light, warm and cold, crystal or stone: bring the force of your will to bear and answer all the questions made by the universe. Welcome to Puzzle Noid. We are the beings no one but ourselves can understand, the voices all others try to ban. The story of Puzzle Noid begins with Silence. Silence has lived deep in the most elevated of the places, Silence has never been plagued by the sorrows of life as the other creatures of this planet. Here, by the shadow of the trees, Silence came to live her forest world. Silence was a blue being, almost nebuloïd, watery blue, with eyes half-moons and life-force intoning from her. In that day a planet gave birth to what came to be named Crystals in the cosmos: Crystals of Earth, Crystals of Moon, Crystals of Energy, Crystals of The Gods. Here Silence, with her immortal spirit, wandered in the forest, found compassion by the monster Deamon, created by the eyes of the gods, his power not strong enough to imprison Silence, but he was able to alter her shape. He used the deepest and darkest recesses of his mind, and the power of love, Silence took the form

of a dark sun, and become the sun and the moon. Then he was able to appear in the form of the being he was, he became a man and has been a part of the history that was engraved on his home planet. But one night Silence witnessed the star of the sun, far away, dying. When she realized she could not flee away from the threat that was about to shatter the balance between the universe, she decided to end her life. Puzzle Noid, her spirit child, has been born into the form of a tailed crystall of light in the effort to reach the dark star. How he can do it? The pieces puzzle has 25 levels of achievements where the player can combine his or her puzzles in different ways to gain more score and hidden power of Crystals.
