Presentation: Art/Animation/CG: (4.3/5) Graphics/Additional: (4.7/5) Sound/Music: (4.3/5) Experience: (4.6/5) Gameplay: (4.8/5) Overall: (4.7/5) Reviewed by: nikkiboy_night- Abduzeedo- Komatsu- maksomucius- Gameplay: Impressions and common complaints The gameplay of Tarnished Soul is pretty much the same as that of Bloodborne. Both games feature a first-person over-the-shoulder view, the gameplay is centered around platforming, and the combat is a sword-wielding system that has you slashing and stabbing your enemies. The development team has been careful with its implementation of that gameplay, and most of the complaints that have arisen on social media have been focused on this aspect of the game. The combat is simple and easy to pick up, but it will take some practice to master it. The immediate feedback that you receive from the controls makes it easy to quickly fight your enemies, although you may have to jump in mid-attack and roll a bit to avoid parries. Tarnished Soul features a robust combat system that features many options and attacks, and it is also easy to customize the different combat elements to suit your play style. You have multiple different weapons, each with its own characteristics, and you can carry two weapons at once. Your attacks are determined by the direction that you move your right hand, and whether you hold down the button or press the dodge button. You can use a dodge move to dodge incoming attacks, and you can also use it to jump, allowing you to jump over enemies. While it can be difficult to master the simple combat system of the game, the fun factor of combat and the depth of the enemies makes Tarnished Soul stand out from the other games in the genre. Gameplay: The core aspects The gameplay of Tarnished Soul is centered around platforming. In the tutorial, you travel from one area to the next through the use of simple platform

What's new in Elden Ring:

Screenshot from a virtual game room.

The gameplay starts as normal in an Ark, where you ride a dragon to fly up in the sky and attack monsters. You walk and run around a map, witnessing the story scroll. Click on an NPC to listen to them and discover what you're doing. As you progress through the story, you learn new skills and form bonds with the characters through the role playing elements. Most important, your emotions influence and change the appearance of the light gauge on your character. While there are many other factors such as bonuses from weapons and armor, skill degradation, and your growing hunger and exhaustion, the Emotion Gauge (□□□□□□) appears in the lower left corner of the screen. As you gain experience, the more intense your emotions become, making your rating of 1 to 5 (little to intense) rise.

As your rating of the emotion gauge grows, you will undergo a chain reaction where your emotions rise and you go into a trance-like state and become enraged. When your rating reaches 4, a dragon will appear. You gain experience points by befriendng and defeating them, and your rating of 5 will become irreversible.

As you develop bonds with the other characters, they will ask that you vote on their decision. If you cast your vote correctly, they will return the favor. If you choose to not vote, they won't listen to you and will keep on doing their plan. Although each of them has their own ability, the story will continue. If you choose to not listen to your friends, you lose all your value as a hero.

There are many choices between good and evil, and ultimately it comes down to you.

"You are a hero." You are a hero. Pick a path, and maybe you'll be an adventurer next time you log in."

In this single-player CMMORPG, you can be a hero or evil.
