Q: How to prepare for the focus group with high charisma? I'm new to focus groups. I've been doing most of my work within 2 hours of work, and last few days I start to feel that my body clock is out of alignment. I've always used coffee to stay awake and sharp, but I keep losing my place in discussions and my ability to make decisions. I'm not sure if this is true, but the focus group is different than the meetings in an office. They are more like 1-on-1 meetings. Since they are not in my office, I keep on losing the focus in the discussions. I know that focus groups are a good sign of my company's success. And I have been hired to be on that focus group. I'm a hired to be on that focus group, and they say that I have high charisma. I am not sure that this is an asset, and should I know any technique to counter those charismatic talks and questions from other people. I'm a relative newbie in the industry. How do I prepare for the focus group? A: Ask your teammates what they enjoy most about their jobs. If everyone answers 'meeting with clients

Q: Origin of "I'm just a round, hairy drinking problem" I'm recently in the process of formulating my own figure-of-speech. Part of me is now curious about its origin so I can make it belong better to the specific sense of English I intend to use it in. The whole thing is going to be about that which it's spoken about so perhaps there's already a meaning I can get a grip on? A: You mean 'Am I a nice round furry cup of ale?' Joseph Strutt's *The Rudiments of English Grammar* (1844) suggests that it is originated from "a phrase in Low Dutch: I am vreet, so het leven in mij als een derde horecht, which in English, 'am fat, so the life in me is round,' should be 'round, so me hair be'". It doesn't seem to have a "formal" meaning, rather it is "emotionally expressive".

Combinatorial growth of Uniform Comb-like Co<sub>3</sub>O<sub>4</sub> Nanostructures on Lamellar NiO for Enhanced Performance of Supercapacitors. Inspired by the highly synergic effect of NiO/Co<sub>3</sub>O<sub>4</sub>, a ternary hybrid carbon sheath/NiO/Co<sub>3</sub>O<sub>4</sub> nanocomposite with high electrochemical activities (supercapacitor) for energy storage applications has been successfully designed by a simple solution process. The hexagonal-shaped NiO nanosheets act as the core and can be uniformly grown on the carbon sheath with limited aggregation. Following the hydrothermal treatment, uniform-sized comb-like Co<sub>3</sub>O<sub>4</sub> nanoparticles with a high surface-area-to-volume ratio (1219 m<sup>2</sup>/g) were formed and relatively strongly attached to the NiO-carbon sheath, providing a

**FTC: > Mon, 29 Mar 2014 19:18:37 +0900 Here is an installment of Kosuke Aimo's Armstrong gallery. You'll probably see his gallery added here too now. He is the regular admiral of Irish commerce and is now deep green on my radar. A website can be found at . Movies that are shown over there tend to have English dub and should not pose any language barrier. Unfortunately most of the available movies were of Poor Quality as I recall. The 'AC' in ACcelerator stands for 'A Canny' pirate. Makes sense if you ask me. Mon, 29 Mar 2014 17:41:01 +0900 In these days, a lot of new-fangled Japanese idols pop up and the usual established ones fade away again. Most gurus in Tokyo still consider Konishi Ichiuji the best of all while Karena safe wearing a Princess Leia mask. The quality of their video and audio can be easily heard and you don't forget them even after the first time you heard them. Meanwhile the former aging Tokyo**

Swift I've been trying to insert the documents in Firestore by using Swift. But so far I haven't been able to. Here is my code for inserting the row in Firestore:

```
self.createUser() var userIDRef = Firestore.firestore().collection("users").document(userID).setData(["first_name": ue.firstName!, "last_name": ue.lastName!]) User: struct User{ var lastName: String! var firstName: String! init (lastName: String, firstName: String) { self.lastName = lastName self.firstName = firstName } } UsersCollection: struct UsersCollection{ var users: [User] = [] init(){ self.initUsers() } func add(user: User) { self.users.append(user) } func addUser(userID: String, firstName: String, lastName: String) { self.users.append(User(lastName: lastName, firstName: firstName)) } }
```

The error I get is: cannot invoke 'setData' with an argument list of type '(["first\_name":, "last\_name" :], [:])' I am a beginner with firestore. A: It seems that if you use setData(["first\_name": "foo", "last\_name": "bar"]) instead of setData(["first\_name": "foo", "last\_name": "bar", "foo": "bar"]), it should work.
