Personally, I would like to help all of my neighbors and those people who have low money. I want to help my brothers to come out of poverty so they can have a better life. This is the team I have to do it. I want to tell you that I will survive and so will they. Our dream is to have a better life by going into film. There are many people who had a better life than us and never went into film. So I hope to be a producer who can help many people. Thank you for watching. published:22 Oct 2017 views:95791 published:29 Jun 2017 views:6214 This is a story of a girl who has been taught to be the perfect hand of a gangster. Despite her being misjudged for the wrong reasons, she ends up becoming an assassin. The middle section of this story is mostly improvisation. This is the most visual video game I've ever played! The reason why I make videos on the gameplay is because as you play you'll see more and more the story that develops and you'll see how it all fits on the game. The gameplay is the actual game. This is why I decided to make this story telling tactic because there has not been many videos on this game while the gameplay is super

Background Cartridge Defense: After having enjoyed the success of our first game Cartridge Defense, we have decided to further develop the game's mechanics, as well as the scope of the game world. We plan to add to the existing 30 levels, possibly expand into multiple zones, and continue to upgrade our levels with new features and content. We plan to expand the game into a traditional roguelike in the very near future, creating a new roguelike mode where we will test and balance out new mechanics before adding them to the current levels and finalizing Cartridge Defense to our standards. We will be updating the game on a monthly basis in the near future. We are aiming to have the following monthly updates completed before we begin Early Access: Fully translate and release the game into French, Spanish and Italian. Add 4 new levels. Update existing game mechanics. Adjust all gameplay elements (Targeting, Upgrades, Defense, UI) and graphics. Add new tower types. Add more unique enemy types. Make more playlists (story, sponsored mode, survival). Add a roguelike mode. Investigate all the issues with the current gameplay. Investigate all the issues with the current technical features. Work on optimizing and scaling the engine. Release the game on Steam Early Access with new features. Create a crowdfunding campaign on Kickstarter. Release all the cards in the game. Hire additional staff to the team. After the game release on Steam and other marketplaces, create an official website and complete the webpack. We plan to update the game on a monthly basis in the near future. special giveaway is happening on twitter, follow me and more info below August 22nd is National Watermelon Day which I have discovered thanks to "The Daily Geekette." I am definitely not a huge fan of watermelon but I am pretty sure everyone else is. So with that in mind, I decided to share some cool facts about the colorful watermelon with you. **BEAUTIFUL MUSIC!** The completely remastered content to Metal Gear Solid 2: Sons of Liberty is now available to the public! Solely based on our fan's requests, we've re-worked and fully remastered the entire game's soundtrack for this release! This soundtrack features an album's worth of content ranging from moody, heavy metal tracks, to moody, chiptune inspired tracks! Trial by Fire is a 3D action/RPG made in the Unreal Engine (using UDK). It's an enjoyable game to play through, if a bit short. The story is setup in a fantasy-realm and involves your character trying to avenge a crime committed by a powerful tyrant. Along the way, you'll fight orcs, draken, elementals, trolls and maybe even some skeletons. The art-style is a mix between Disney (hey, it's on the Unreal Engine!) and Mortal K
