Christmas 3D screensaverÅ. Install crack for your Christmas Screensaver 2.0 build 9 (x64).. ChristmasÅ. Q: any way to know the block size and how many threads a program uses? I'm kind of newbie in gcc and I want to learn about parallelism. if I compile a program gcc -fopenmp -o parallel_program how can I know the block size and the number of threads used? thanks. A: I have no idea how your compiler solves OpenMP, but you can easily find the information in the binary: gcc -v parallel_program -Q --run-v-instr The output will be of form something like: > Parallel compilation from `parallel_program' terminated with exit status 1 > gcc -v > Use TCC Thread Model Program > Program compiled with GCC > Copyright (C) 2013 Free Software Foundation, Inc. > This is free software; see the source for copying conditions.
