AutoCAD's growth enabled Autodesk to branch into software development and venture into other markets. AutoCAD Design Suite, released in 2001, was the first version to be designed for all three platforms: the PC, Mac, and Linux. This release became AutoCAD's first desktop application to run on Windows, Mac, and Linux. In 2013, AutoCAD 2010 was the best-selling software in the platform category. Its popularity has led to the development of specialized design software for architecture, construction, automotive, product development, and mechanical engineering. It has also become the cornerstone of architectural and construction firms. AutoCAD 2012 also achieved the highest unit sales for a quarter of a decade. AutoCAD was introduced in 1982 for the first time. AutoCAD 1.0, which released on December 18, 1982, was the first version of the application that was compatible with Windows and Linux computers. The first Autodesk CAD application developed, the release of AutoCAD 1.0 was initiated on the Windows 3.1 platform. The first available AutoCAD release is AutoCAD 1.5, which was released on October 18, 1985, on the Macintosh. In 1995, AutoCAD 2.0, the first version compatible with Windows 95, was released. AutoCAD 2.0 became the first major release to include a commercial "add-in" version of AutoCAD. AutoCAD is currently marketed in many different ways, such as AutoCAD Architecture, AutoCAD LT, AutoCAD LT Architecture, AutoCAD Mechanical, AutoCAD Electrical, AutoCAD Multiuser, AutoCAD Web, AutoCAD Electrical I, AutoCAD Mechanical I, AutoCAD Electrical II, AutoCAD Sheet Metal, AutoCAD Design Suite, AutoCAD Architecture for Professional Excellence, and AutoCAD Architecture for Professional Excellence RSL. AutoCAD History The first AutoCAD AutoCAD 1.0 (November 1981) was a creation of two Autodesk developers, Jeff Atkinson and Dan Vos. It was intended to run on the Intel 8088 chip. The Coop Economico Banche popolari said it has donated the food to the Food Bank of Italy, and the food bank in turn has sent the food to towns across the country. The food bank said the donations include 80 tonnes of rice, 100 tonnes of pasta, 30 tonnes of cornmeal, 100 tonnes of vegetables, 25 tonnes of fresh fruit, 120 tonnes of milk powder and milk, and 20 tonnes of oil. The agency added that 10 tonnes of dried food were donated as well, and 10 tonnes of bread were sent directly to families. The food bank said it has also sent a team of experts to the area to assist the families with any other concerns. "We are trying to respond to the people's needs as quickly as possible," said Coop's Giovanni Mangano, the general manager of the food bank. The first people to receive the food on Saturday were people at risk of contracting the coronavirus, such as the elderly and children, the organisation said. People who have symptoms but who are not at risk of contracting the coronavirus, such as pregnant women, the immunocompromised and people with digestive problems, are also being served. A large portion of the food is meant for those who have not received enough to eat for a few days, and is being given out for free, Mangano said.
