I was preparing to use the MAX800 to print my 128x64 coupons at the counter. But, they want the info that they provide online. So, I need a way to download the data manually. I tried two approaches. First, I downloaded the Excel file, which I was able to open in Excel. The coupon data still seemed to be corrupted. I then installed the VueScan, to open the scanned image and tried to use it. It failed, because you can only use VueScan to digitize printed material, and it does not include a program to upload data. This is a real problem for me. I have a lot of coupons to make and I don't want to go to the trouble of hiring a professional to scan them all. So, I will have to return and get a different scanner. Thank you for creating a way of downloading the data from the printer. I like your software, as well as your service. I recommend you to you as a service supplier. The download speed is amazing for my connection. Thank you again, Max." Max Blaak 6d1f23a050
