I'm fairly new to flash, and I'm a bit confused as to how to reference my images. So I had a layer "wizard" that contains a background and 6 sprite layers beneath it. My problem is that the sprite/images only show up in the tiles that are highlighted. To fix this, I need to make my images relative to the loader. In regular flash, when I'm loading an image of a certain name (ex: a.png), it takes the absolute path of the image and loads it. So my question is, is there some way to do this in as3? I need an image that will always be a relative path to my swf. A: You can access

`URLLoader.current.getResourceClass()` and use it to retrieve the class name of a loaded resource. Q: How to resolve this Error in Processing? I am a very new bee of java and processing. I am trying to create a grid of 4 squares. I have written the following code

```
import processing.core.*;
import processing.data.*;
import processing.opengl.*;
void drawGrid() {
  ArrayList lista = new ArrayList();
  lista.add(new Point(0, 0));
  lista.add(new Point(0, 25));
  lista.add(new Point(25, 0));
  lista.add(new Point(25, 25));
  ArrayList proj = (ArrayList)lista.get(0);
  ArrayList linea = (ArrayList)proj.
```
